

TIME WARNER CABLE  
**Government Solutions**

DEDICATED ACCESS

Time Warner Cable is a leading provider of communications services to government agencies. Our optical Ethernet networks within metropolitan areas enable agencies to enhance their Continuity of Operations Planning (COOP) and reduce the cost of fiber access.

## Flexible Fiber-Based Metro Ethernet Services

Time Warner Cable's services enable agencies to extend their branch office LANs to centralized database servers, connect groups of buildings together within a metropolitan area, and provide high-speed Internet access. Network operating expenses are controlled effectively by adding bandwidth in small or large increments to match agency requirements.

### Turn COOP Requirements into Cost-Reduction Opportunities

Time Warner Cable's Metro Ethernet services help agencies address their COOP requirements:

- Agencies improve their ability "to communicate with COOP personnel, other agency employees, leadership and other agency elements, (including) bureaus, regions and field offices"\*
- Metro Ethernet services are cost-effective due to plug-and-play functionality; there is no need to purchase additional, expensive customer premise equipment

### Flexible Ethernet Applications

Augment your agency's critical network infrastructure with bandwidth flexibility and scalability ranging from 5 Mbps to 1 Gbps port speeds:

- **Point-to-point connectivity** provides efficient data transfers between facilities or offices
- **Point-to-multipoint connectivity** links high-capacity, high-performance data connections between multiple field offices to a main office or data center

Scalable Internet access with Ethernet:

- **Dedicated Internet access** provides high-available Internet connections to increase public access to services through Web-based applications
- **Teleworker aggregation** ensures government teleworker data doesn't transverse the public Internet to access an agency's private data network

### Get the Benefits of Choosing a Strong, Experienced Provider

Time Warner Cable's established nationwide network infrastructure is designed to meet your agency requirements. We built and maintain our own state-of-the-art cable infrastructure and regional fiber rings, enabling agencies to communicate as a team and perform at the highest level possible. We provide:

- SLA levels to address packet loss, availability, and latency requirements
- Custom-billing options for a single headquarter site or multiple branch office sites
- 24x7 technical support

### Time Warner Cable on GSA Schedule

- Time Warner Cable is a preselected vendor; we help agencies focus on their IT needs instead of budget pressures
- Leveraging the GSA Schedule lets each agency take advantage of lower administrative costs, billing in arrears, optional payment by government credit card, and expedited network installation
- GSA SCHEDULE GS-35F-043 1 K\*\*

Time Warner Cable offers Metro Ethernet services via our state-of-the-art network infrastructure, providing government agencies with the scalability to address COOP objectives. Optional network configurations and dedicated Internet access with tiered bandwidth means agencies only pay for the bandwidth they need, reducing the overall cost of IT expenditures.
