

## Technology that turns mission critical into mission accomplished.

You conduct business in a world where diligent continuity planning and alternate route-path strategies are not an option — they are a necessity. Customers demand 24/7 access to their accounts. Regulators demand records, redundancies and fail-safe systems unheard of just a few years ago.

### Your lifeline to business continuity with speed and savings

Your Time Warner Cable Business Class Account Representative can show you how our wholly owned network and unique infrastructure can help you control costs as you provide continuity of services to your customers. Our secure, highly redundant network becomes your lifeline to:

- **Business Continuity:** With a unique cable plant infrastructure and regional ring topology, independent of other telecom companies, we can provide continuous delivery of services in case of an emergency.
- **Service Levels to Address Compliance:** As performance, transparency, customer data replication and privacy standards become more demanding, our strict Service Level Agreements (SLAs) on packet loss and data latency can help address compliance standards, saving you time and resources.
- **Secure Remote Access:** A network built and maintained by the latest managed security services provides your customers with the confidence that their information is secure, no matter how they access the network.

### The Business Continuity Challenge

Thirty-seven percent of financial institutions list business continuity as one of their top five priorities. Only 63% of respondents have an information security strategy to address business continuity.\*

## Solutions for a flexible and cost-effective network

Time Warner Cable Business Class combines the engineering and technical expertise of a national communications leader with local service and support. Solutions that we can configure to meet your unique objectives include:

- **Ethernet Solutions:** Use Ethernet technology for connectivity between remote offices. These solutions let you cost-effectively run networked applications.
- **Dedicated Internet Access:** Enjoy a dedicated fiber-optic connection for data transmissions on our high-capacity fiber network, all with the high availability, minimal latency and strict packet loss Service Level Agreements (SLAs) you need for business-critical, highly regulated financial applications.
- **Managed Security:** Protect sensitive data and systems with proactive security monitoring, intrusion detection, isolation and response, while freeing IT staff from this burden.
- **Branch Office Connectivity:** Provide secure Internet connectivity and incredibly fast transmission speeds to dispersed locations that need to run high-bandwidth financial applications.
- **Teleworker Solutions:** Bring secure, high-speed Internet and always-on network connectivity to home workers. You can potentially reduce real estate costs, improve productivity and retain valuable employees.
