

Business Class Ethernet

ETHERNET CONNECTIVITY helps boost productivity

Now businesses seeking to seamlessly extend their Local Area Network (LAN) without the difficulties of owning and managing their own Wide Area Network (WAN) have an excellent alternative to Frame Relay, Private Line and Data T1 solutions: Business Class Ethernet from Time Warner Cable Business Class. This cost-effective solution allows businesses to migrate to an Ethernet solution over Time Warner Cable Business Class's reliable state-of-the-art network. Organizations such as educational institutions seeking to connect multiple locations as one network, financial institutions seeking a point-to-point connection to securely transfer private financial data, or hospitals that need to connect multiple departments to transfer vital patient information can implement an Ethernet solution affordably.

Business Class Ethernet offers customers a flexible and scalable means to migrate to an advanced Ethernet solution. With this flexible Ethernet solution, customers will enjoy scalable bandwidth tiers at 512 kbps, 1.5 mbps and 2 mbps symmetrical service*, ensuring minimal disruption for businesses that anticipate a need for increased bandwidth in the future. Another advantage is that it allows simple customer management of proven Ethernet technology. And it can be easily upgraded with just one phone call. In addition, Business Class Ethernet is a cost-effective solution that affords more value to businesses and organizations since it can lower total cost of ownership by reducing capital outlay on routers, switches and hardware.

Time Warner Cable Business Class offers a broad range of voice, data and video solutions. Contact your local Time Warner Cable office for a free consultation today.

- > **Scalability**
Minimal disruption for enterprises anticipating the need for increasing bandwidth.
- > **Value Through Availability**
A cost-effective alternative to Frame Relay, Private Line and Data T1 solutions.
- > **SLAs**
Ensuring high performance with advanced network monitoring.
- > **Industry-Leading Certification**
Business Class Ethernet is Metro Ethernet Forum (MEF) certified.

Business Class Ethernet

Benefits

- > Highly affordable — an excellent alternative to Frame Relay, Private Line and Data T1 solutions
- > Scalable — providing incremental bandwidth options, so organizations can purchase only the level of service they need
- > Convenient — offering organizations the benefit of working with just one company to meet all of their data, voice and video needs with one point of contact and one bill
- > Easy to upgrade — enterprises can upgrade their Business Class Ethernet service with just one phone call
- > Easy to implement and manage — since organizations can maintain their existing LAN, Business Class Ethernet is easy to install. It is also easier to integrate and extend now that complex LAN-to-WAN conversion technologies have been eliminated

Features

- > Bandwidth versatility achieved through multiple circuit configurations and options
- > Includes point-to-point and point-to-multipoint functionality and features
- > Reliable performance — backed by robust SLAs
- > Round-the-clock, proactive end-to-end network monitoring ensures continuous network accessibility
- > Dedicated customer support 24/7 to resolve any questions

National Presence

Services are not necessarily available throughout the shaded areas.
 Services are available only in the indicated metropolitan areas of the shaded states.
