

TIME WARNER CABLE Government Solutions

DEDICATED ACCESS

Time Warner Cable is a leading provider of communications services to government agencies. Our optical Ethernet networks within metropolitan areas enable agencies to enhance their connectivity to the state.

 TIME WARNER CABLE
Business Class

Flexible Fiber-Based Optical Network Services

Boundless and scalable bandwidth capability, Service Level Agreements (SLAs), and a reliable fiber-optic network infrastructure – these are necessities for enterprise organizations that are deploying data-centric enterprise applications such as video, distance learning, video conferencing and CRM. Network operating expenses are controlled effectively by adding bandwidth in small or large increments to match agency requirements.

Get the Benefits of Choosing a Strong, Experienced Provider

Time Warner Cable's established nationwide network infrastructure is designed to meet your agency requirements. We built and maintain our own state-of-the-art cable infrastructure and regional fiber rings, enabling agencies to communicate as a team and perform at the highest level possible. We provide:

- SLA levels to address packet loss, availability, and latency requirements
- Custom-billing options for a single headquarter site or multiple branch office sites
- 24x7 technical support

Flexible Applications

Time Warner Cable offers fiber-based solutions designed specifically for government organizations that need ample bandwidth across the network. Bandwidth flexibility and scalability ranges from 4 Mbps to 10 Gbps port speeds.

Our suite of network offerings include:

- **SONET** providing a Layer 1 network with the ability of advanced network management and maintenance features
- **Ethernet** providing a Layer 2 network and the ubiquity of Ethernet

Our topology configurations are designed to meet your needs:

- **Point-to-point connectivity** provides efficient data transfers between locations
- **Point-to-multipoint connectivity** links high-capacity, high-performance data connections between multiple field offices to a main office or data center
- **Multipoint connectivity** links high-capacity, high-performance data connections between multiple offices, with each location having the ability to communicate with one another
- **Ring connectivity** links data connections between multiple offices in a ring topology

Cost-Reduction Opportunities

Metro Ethernet services are cost-effective due to plug-and-play functionality; there is no need to purchase additional, expensive customer premise equipment

- **Teleworker aggregation** ensures government teleworker data doesn't transverse the public Internet to access an agency's private data network

Time Warner Cable holds a State of Ohio Master Service Agreement (MSA)

- Time Warner Cable is a pre-selected vendor; we help agencies focus on their IT needs instead of budget pressures
- Leveraging the State MSA lets each agency take advantage of lower administrative costs, billing in arrears, optional payment by government credit card, and expedited network installation
