

Financial Services

As a financial services institution, you seek scalable technology solutions that provide reliable and secure services while addressing regulatory mandates. Time Warner Cable Business Class offers network solutions for financial services institutions to avoid costly downtime and support greater connections with employees and customers.

The Convergence of Financial Services and Technology

Time Warner Cable Business Class understands your financial services business requirements because we've helped organizations like yours improve the reliability and efficiency of their networks. Our local and knowledgeable professionals work with you to address your top priorities:

- Offering robust network diversity with regional ring topology to minimize downtime
- Complying with regulatory mandates to meet business continuity, transparency, accountability, and privacy requirements
- Expanding services while maintaining consistent security to provide customers with real-time financial information from any location – an ATM, a branch office, or a home computer

Invest in Time Warner Cable Business Class

Time Warner Cable Business Class helps your business improve network resiliency, create regional private data networks, and support continuous access for employees and customers while addressing regulatory compliance requirements. Our solutions work within your parameters while allowing you to focus on what really matters – your customers.

Focus on Business Continuity*

The ability to continue to function after a major disruption is essential for all organizations – and doubly so for those whose services include providing real-time financial information to their customers

49 percent of financial institutions list business continuity as one of their top five priorities

Financial Services

With Time Warner Cable Business Class solutions for financial services, your organization can leverage a reliable and secure network that supports connectivity and availability for on-site and remote locations. Our established, wholly-owned network and regional infrastructure offers scalable bandwidth up to 10Gbps,* robust SLAs, and dedicated support. We also provide you with:

- **Metro Ethernet Solutions** backed by resilient ring technology that enhances network reliability and diversity – helping to ensure availability
- Ability to help design **regional private data networks** so your data doesn't have to traverse through the public Internet
- **Dedicated Internet Access** to provide secure transmission of sensitive digital data over a dedicated and continuous connection between your local area network and the Internet
- Superior **managed security** to protect your organization's dispersed offices
- **Local customer support** 24/7 from professionals who live and work where you do
