

Healthcare

Healthcare organizations seek technology solutions that improve the quality of patient care while addressing requirements brought on by spiraling costs, staffing shortages, and new initiatives such as Electronic Health Records (EHRs). Time Warner Cable Business Class offers solutions with bandwidth flexibility and managed security to ease the transition to EHRs and, consequently, help improve patient care.

The Convergence of Healthcare and Technology

Time Warner Cable Business Class understands your healthcare business requirements because we've helped organizations like yours improve network performance to provide better patient care. Our local and knowledgeable professionals work with you to address your top concerns:

- Ensuring privacy and security of patient health record information with managed security services
- Enabling efficient transmission of digital patient data and sharing of bandwidth-heavy records
- Improving bandwidth capabilities to accommodate Internet applications and portals that support patient services and add value to your organization

Prescribe Time Warner Cable Business Class

Time Warner Cable Business Class helps your organization protect patient privacy, embrace the benefits of digital records by reducing reliance on burdensome paper documents, and in turn enhance care while keeping pace with rising expectations. Our solutions work within your parameters and enable your transition to EHRs while allowing you to keep your mind on what really matters – your patients.

The Drive to Electronic Health Records

In an effort to improve the nation's healthcare system through technological innovation, the government expects widespread adoption of EHRs by 2014

Use of EHRs in office-based practices has increased 32% since 2001*

* SOURCE: Center for Disease Control, National Center for Health Statistics, "National Ambulatory Medical Care Survey," 2005

Healthcare

With Time Warner Cable Business Class solutions for healthcare, you can leverage a reliable network that supports your commitment to patient service and addresses communication capability requirements for EHR adoption. Our established, wholly-owned network and infrastructure offer scalable bandwidth up to 10Gbps*; robust SLAs, and dedicated support. We also provide you with:

- Superior **managed security** and storage services to protect your patients' privacy and support your adoption of EHRs
- **Dedicated Internet Access** to provide secure transmission of sensitive digital patient data over a dedicated and continuous connection between your local area network (LAN) and the Internet
- **Robust, resilient ring technology** that enhances network reliability and diversity, ensuring patients receive consistent levels of access to critical healthcare information
- **Local customer support** for your organization, provided by professionals who live and work where you do
