

Higher Education

Higher education institutions need technology solutions that meet their bandwidth and security needs to address the demands of students and faculty to foster a modern and productive learning environment. Time Warner Cable Business Class offers solutions that support innovative technologies for higher education institutions by providing a network that is flexible, easy to manage, and secure.

The Convergence of Higher Education and Technology

Time Warner Cable Business Class understands your higher education requirements because we've helped campuses like yours improve the quality of their networks. Our local and knowledgeable professionals work with you to address your primary challenges:

- Improving bandwidth capabilities to accommodate large software applications and school portals on the Internet that are important to students and faculty
- Providing secure and flexible communications on and around campus – from dorm rooms and classrooms to the library and administrative offices
- Offering scalable solutions that can support enrollment fluctuations throughout the year

Recruit Time Warner Cable Business Class

Time Warner Cable Business Class helps your campus provide reliable and secure network access to students, faculty, and administrators to support their demand for more services at faster speeds. Our solutions work within your parameters, so you can keep your mind on what really matters – educating the leaders of tomorrow.

IT Requirements on Campus*

In addition to expecting bandwidth, access, and services, students may demand that institutional IT mesh better with the personal IT they own and use

Consequently, this will require “more bandwidth, more storage, and greater speed”
